**DETAILED ACTION*****Election/Restrictions***

1. Applicant's election of Species disclosed in figure 24, in the reply filed on 02/05/2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

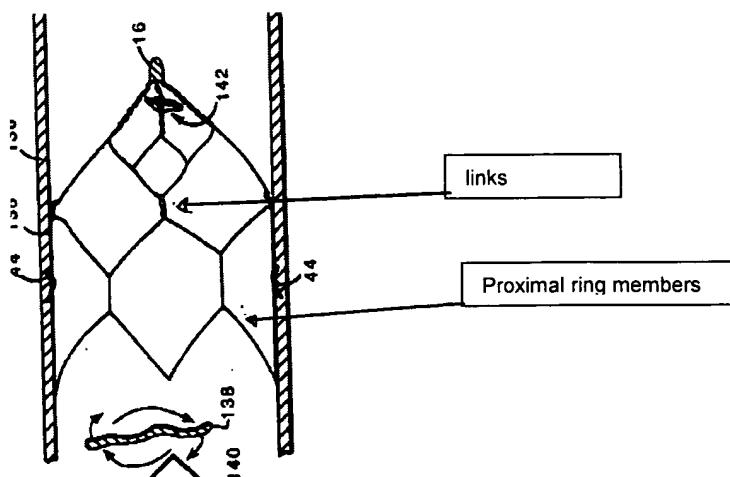

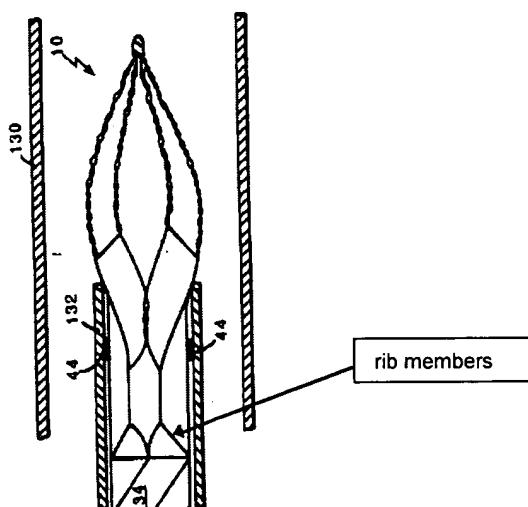

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 6, and 13-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Nott et al. (U.S. 6,013,093).

Nott et al discloses the claimed invention in figures 5, 5A, and 7, an elongated member (134) having a first end portion configured to extend exterior of the body lumen; a body (10,170) attached to the second end portion of the elongate member (134); a pair of rib members (drawing below) extending distally from the elongate body (134) and branching into a pair of proximal ring members (drawing below); wherein each proximal ring member branching into pairs of distal ring members (at 184,186) to thereby define pairs of adjacent distal ring members (at 184,186) converging into a plurality of single members (176) which converge to define a distal end of the body and furthermore, wherein the proximal ring

members are connected to the distal ring members (184,186) via plurality of links (shown drawing below).

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Dormia (U.S. 4,347,846).

Dormia discloses substantially as claimed in figures 1-3, an elongated member (2,3) having a first end portion configured to extend exterior of the body lumen; a body (8) attached to the second end portion of the elongate member (2,3) and wherein the body (8) including proximal and distal portion and midsection.

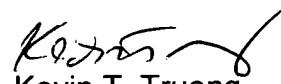

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Denison et al. (U.S. 6,575,996) discloses a filter device.
